

Understand the role of innovation on the development and interaction of societies.

- Understand significant changes caused by technology, industrialization, urbanization, and population growth and the effects of these changes.
- Understand the historical impact of the interaction and interdependence of science, technology, and society in a variety of cultural settings.

1. Choose a new/improved technology, industry, or population trend from between the end of WWII and the Eisenhower administration - including but not limited to: atomic bomb, space exploration, home appliance advancement, weapons technology, cars, moving to the suburbs, etc.

2. Tell why it is significant. What changes occurred because of it (if any)? Give at least 3 examples of the change or significance of your topic. - 3 points for each example, 1 point for writing quality.

3. How has your topic choice impacted the way you live today? How has it changed, impacted, or made a difference to the lives of Americans today? (Give at least 3 examples). - 3 points for each example, 1 point for writing quality.
